# Executive Summary

José Antonio Miguel Señorix opening henergy technologies corp in Dover Delkaware in December 2023 with the idea of looking for new alternatives to the needs of electrical energy, technology and civil logistics and industry.

## Business opportunity

- Living lithium battery composed of thousands of moving cells that generate a charges the battery at the same time of use.
- This new "live" battery will allow you to take trips in electric cars 100 times superior to the current ones on the market without recharging.
- Manufacturing cost similar to current lithium.
- Lower risk of fire.
- Implementation of multiple prototypes for multiple brands in the market in less than a year about 6 months approximately.
- These batteries can be used in other sectors of industry and other purposes
- Mass production exceptional quality-price ratio

---

## Marketing Plan Summary

- With an initial investment of \$10,000,000 we can complete in less than a year  
months . . . sample batteries for multiple brands and demonstrate internationally  
that a vehicle can almost completely cross the United States from end to end without stopping to recharge. . . . About 7
- Industrial target market
- Main competence (Does not currently exist)
- Great competitive advantage

Currently prototype in manufacturing . . . our purpose is to manufacture this model and more advanced models based on this one.

We are looking for investors to carry out the manufacturing and presentation of the product to the Potential customers.

With an investment of €10,000,000 we can foresee the international launch in 7 months with almost immediate success and benefits and completely changing the market.
